PROFESSIONAL OVERVIEW

Over 3 years' experience managing Salesforce environments, proficient with SFDX CLI, Git, and Flow Builder to ensure metadata integrity, automate workflows, and enhance efficiency. Skilled in optimizing platform performance and driving collaboration, innovation, and continuous improvement in agile teams.

WORK EXPERIENCE

Systems Engineer

Project:

Sunrise,MI

Company: S&P Global

- Supported Salesforce environments across Development, UAT, and Production, ensuring consistency throughout the SDLC.
- Collaborated with engineers to maintain metadata integrity using SFDX CLI and Git, enabling safe, trackable deployments with rollback capability.
- Assisted in CI/CD pipelines with Jenkins and GitHub Actions to automate testing, validation, and deployments.
- Monitored API limits, debug logs, and event dashboards to optimize integrations and platform performance.
- Configured and maintained custom objects, validation rules, record types, and layouts to align with business needs.
- Developed and optimized automated workflows with Flow Builder and Record-Triggered Flows to streamline approvals and notifications.
- Managed deployments with change sets and unlocked packages, ensuring secure, consistent delivery.
- Assisted in configuring integrations via REST/SOAP APIs, Named Credentials, and middleware (Zapier, Mulesoft).
- Administered user provisioning, roles, permission sets, and profiles to enforce data security.
- Documented configurations, deployment processes, and architecture decisions to support onboarding and compliance.
